

**Zachary Seldess, *Agie***

*Agie* is a solo incarnation of Agnes - one of the four sonic/visual characters in my multimedia chamber work *Fred, Victoria, Bruce, and Agnes - LIVE*. In this work, the performer brings Agnes to life via a text-command based virtual instrument (a software program similar to that used in *Two Pieces for Solo Laptop*). Through this instrument, the performer controls a small choir of Agies - a virtual set of sextuplets to be projected for the audience. If internet is available, the instrument can be played by two performers simultaneously (each performer manipulating the other's instrument remotely).
